Hannah Arendt's Phenomenology of Plurality

Mardi 21 mars de 16h à 18h

Salle B1 bât. ARSH

With her key concept of plurality, Hannah Arendt has not only made an important contribution to political theory but has in fact rethought the philosophical tradition she came from. In my talk, I would like to show that this notion of plurality has to be interpreted from a phenomenological angle, while at the same time, it is a paradigm that introduces the political into phenomenological thought.
